lower Lakes, but it was considerably more than average in Wisconsin and upper Michigan, where most of it came during two storms of the first week. In Ohio and Indiana and in Kansas and western Missouri the southern limit of the snowfall was unusually far to the north for April.

In the elevated portions of the Western States conditions varied greatly; but the snowfall was light in most mountain portions of Arizona and New Mexico and of many of the more northern States. On the other hand, the California, Nevada, and Utah mountain areas had much more than the normal amounts for April, especially the Sierra regions between 40° and 36° latitude. Here Glacier Point, Calif., recorded no less than 113 inches fall during the month.

The snow remaining at high levels at the end of April did not give promise of abundant stream flows next summer in Arizona and in most parts of the North

Pacific States. In California and Nevada the April falls considerably improved the prospects, yet they were mainly a little below average; the April snowfall did not pack well, and the late summer water supply is likely to be inadequate. In Utah, Idaho, and the Rocky Mountain States the prospects for stream flow were usually rather better than the average.

## RELATIVE HUMIDITY.

The distribution of the relative humidity, like the precipitation, varied greatly at near-by points, but on the whole the monthly averages were below normal from the middle Mississippi Valley eastward and northeastward to the Atlantic coast. Over other districts the averages were mainly above normal, with the greatest excesses in the southern portions of the Great Plains and Plateau regions, and locally in central California.

## SEVERE LOCAL STORMS, APRIL, 1923.

The table herewith contains such data as have been received concerning severe local storms that occured during the month. A more complete statement will appear in the Annual Report of the Chief of Bureau.]

Place.	Date.	Time.	Width of path (yards).	Loss of life.	Value of prop- erty de- stroyed.	Character of storm.	Remarks.	Authority.
Chappells, S. C	4					Wind	School building wrecked	Official, U. S. Weather
Wake-Nash county line, N. C.	4	6 p. m			\$100,000	Tornado	25 small buildings damaged or completely de- stroyed, also about 40 tobacco barns and out- houses: many large trees uprooted; 2 persons injured.	Bureau. Do.
